Personal Statment

Motivated and adaptable Computer Science student with a strong foundation in programming, hardware development, and data analysis. Seeking a competitive opportunity to leverage my skills and contribute to innovative projects in a dynamic environment.

Experience

Assistant Chef & Operations Manager/Backend Solution Developer| Oh My Yum's Kitchen Remote (Deliveroo) | August 2023 – November 2023

- **Oversaw end-to-end kitchen operations** for a high-demand online restaurant, ensuring seamless order fulfillment through Deliveroo.
- **Managed order reception and team coordination**, assigning tasks to optimize kitchen workflow and meet tight delivery deadlines.
- **Directed food preparation processes**, enforcing strict quality control measures to maintain consistency and uphold high culinary standards.
- **Implemented operational efficiencies**, streamlining inventory management and ingredient preparation to reduce waste and improve turnaround time.
- **Enhanced customer satisfaction** by ensuring timely and accurate order execution, contributing to positive online reviews and repeat orders.
- **Worked on Developing the backend solution and marketing**

Sales Assistant | NEXT Aberdeen, UK | December 2023 – December 2024

- **Delivered exceptional customer service**, creating personalized shopping experiences that enhanced customer satisfaction and loyalty.
- **Managed inventory with precision**, ensuring optimal stock levels, reducing discrepancies, and improving product availability.
- **Led onboarding and training initiatives**, equipping new hires with in-depth product knowledge and sales techniques to maximize performance.
- **Consistently exceeded monthly sales targets**, leveraging persuasive communication and strategic upselling to drive revenue growth.
- **Collaborated with management** to implement merchandising strategies, optimizing store layout for increased customer engagement and sales.
- **Resolved customer inquiries and complaints effectively**, ensuring swift issue resolution and maintaining the store's reputation for excellence.

Education

High School Diploma | 2021 | Oasis International School, Kuala Lumpur, Malaysia

High School Diploma | 2023 | NorthStar Academy

B.S. in Computer Science | Anticipated First-Class Honours | June 2027 | University of Aberdeen, Aberdeen, UK

Skills, Abilities & Achievements

- **Education:**

- Advanced Placement (AP) Scholar with Honour
- AP Computer Science A (Outstanding Grade)
- AP Computer Science Principles (Outstanding Grade)
- AP Microeconomics (Outstanding grade)
- AP Statistics (Outstanding grade)
- AP Physics 1 (Outstanding grade)

- **Programming Languages:** Python, Java, JavaScript, Swift, SQL, MATLAB

- **Hardware Expertise:** Expertise in building high-performance custom computers and cryptocurrency mining rigs, with a strong focus on hardware optimization and efficiency tuning. Skilled in configuring multi-GPU systems, power management, and cooling solutions to maximize computational throughput. Experienced in algorithm optimization for workload efficiency, fine-tuning hardware for intensive processing tasks, and ensuring system stability under high-demand conditions. Strong understanding of scalability, thermal dynamics, and resource allocation, making these skill sets well-suited for demanding computational environments.

- **Technologies:** Git, SQL databases, relational database management, app development tools

- **Other Skills:** Retail management systems, team collaboration, problem-solving.

- **Advanced Placement Computer Science Project :**

- Collaborated with a team to develop a shopping application using Swift.
- Personally implemented and optimized features, including the app's scrolling functionality.
- Delivered a fully functional app, enhancing the user experience and usability.

- **University SQL Data Analysis Project:**
- Parsed and analyzed massive datasets using SQL.
- Designed and implemented functional relational databases for efficient data management.
- Presented results that improved data accessibility and decision-making.

Intrests & Hobbies

My Hobbies and interests include cryptocurrency and blockchain technology, software and application development, going to the gym, and playing sports. I enjoy staying active, improving fitness, and engaging in competitive or recreational sports.
